

For Immediate Release

Candelis Announces FDA 510 (K) Approval of ImageGrid™ PACS Multi-Modality Visualization Solutions

Irvine — March 3, 2008 — Candelis, Inc. today announced that it has received 510(k) approval from the U.S. Food and Drug Administration (FDA) for its ImageGrid™ Mammography Web Viewer and ImageGrid Radiology Web Viewer, which are now part of its ImageGrid RIS/PACS Appliance product line.

The ImageGrid™ RIS/PACS Appliance is now the most cost effective, feature-rich and comprehensive medical image management and workflow solution in the market. By uniquely offering a fully integrated solution on a single hardware platform, ImageGrid™ has emerged as a disruptive innovation, and is being rapidly adopted by hospitals and imaging centers.

ImageGrid Mammography Web Viewer and Radiology Web Viewer can be used as a diagnostic device for timely access to studies from anywhere and at any time, thereby improving patient care. Both viewing applications are highly scalable and can accommodate multiple concurrent users without the need to invest in additional servers. As a multi-modality solution, the viewers enable radiologists to view all relevant prior studies from one workstation.

For hospitals with specialty imaging departments, Candelis' ImageGrid™ PACS appliance enables immediate access and diagnostic viewing capabilities from any workstation on the network. As a thin-client application, ImageGrid Mammography Viewer does not require the installation of expensive software on every workstation on the network or a physician's home workstation.

ImageGrid™ RIS/PACS Appliance customers have been able to reduce overall image management and visualization costs by up to 75 percent, enabling them to gain a competitive advantage by implementing an economical, industry standards-based, and HIPAA-compliant medical image management solution.

About Candelis, Inc.

Based in Irvine, Calif., Candelis, Inc. is a medical informatics company that develops and markets RIS/PACS appliance for storage, management, distribution and visualization of patient radiological data and medical images. Candelis' disruptive innovation has enabled the company to offer its RIS/PACS appliances at disruptive prices, and consequently has triggered an accelerated and unprecedented adoption cycle in the medical imaging and informatics market. Recently, more than 300 regional/community hospitals and imaging centers have selected Candelis' ImageGrid PACS appliance to address their needs in radiology, mammography, cardiac imaging and PET/CT.
